

JPLcrypto

Whitepaper

A token designed to give back to the community!

Reason behind JPLcrypto

JPLcrypto is a Binance Smart Chain token.

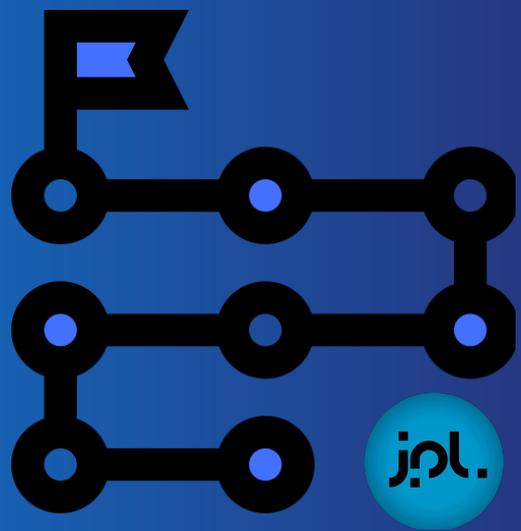

The sole purpose of creating JPL was to give back and support the community!

Our aim is to Consistently give back to random wallets pulled from the blockchain, For as long as we can. This gives all JPL holders a chance to reap the rewards. Almost like a free lottery, As long as you hold JPL your in with a chance.

What is a cryptocurrency without investors?

Why not give back to those who make your project possible.

Roadmap

Our road map is simple!

- . Create exposure
- . Grow our community
- . Collaborations
- . Apply for JPL to be listed on coinmarketcap
- . Introduce JPL to global exchanges
- . Take JPL to the moon

Safety

Rest assured we have sent 100% of LP tokens to a burn address so there is no possible way we can perform a “rug pull.”

A rug pull is a malicious maneuver in the cryptocurrency industry where crypto developers abandon a project and run away with investors' funds.

Once a significant amount of unsuspecting investors swap their coins for the listed token, the creators then withdraw everything from the liquidity pool, driving the coin's price to zero.

Burning LP tokens was a decision made by the team to instill confidence in the community and the long term success of the project.

Burning tokens

Sometimes burns matter; sometimes they don't. A continuous burn on any one protocol can be nice in the early days, however, this means the burn cannot be finite or controlled in any way. Having burns controlled by the team and promoted based on achievements helps to keep the community rewarded and informed. The conditions of the manual burn and the amounts can be advertised and tracked.

Future burns - Our first 250k burn is set to take place when we reach a milestone of 500 wallet holders.

Followed by another 250k at 2000 holders.

After this anymore future burns will be announced on our social media accounts.

For anyone unaware what burning tokens means this is where the transaction we send travels to a dead wallet address - and are permanently removed from our circulation. The black hole we like to call it. WHY? With fewer outstanding shares, the ratio of net income to shares becomes higher.

DISCLAIMER!

The information shared in this whitepaper is not widely inclusive or extensive and doesn't in any way place the developers into a legally binding relationship to guarantee the stated outcomes.

The main purpose of this whitepaper is to give prospective investors relevant information concisely to empower them to perform their due diligence to make an educated investment decision.

Before you decide to invest into JPLcrypto, We recommend you read this whitepaper thoroughly. The prospective investor must understand that varying market conditions may create the expected outcomes.

It may differ significantly and substantially from forecasts predicted.
